

California OES Weather Threat Briefing

Sunday, August 30, 2020
9:00 AM PDT

- **Day 1 (Sunday):** Elevated to locally critical fire weather conditions are expected today into Monday as northeasterly winds increase across portions of the state.

National Weather Service
Western Region Headquarters
Regional Operations Center
Salt Lake City, UT

WEATHER KEY POINTS

08/30/20 - 09/05/20

Sunday-Monday

- Somewhat cooler temperatures will lead to decreased heat concerns
- Increased northeasterly winds across the state Sunday into Monday, combined with continued dry conditions, will lead to elevated fire weather concerns
 - Locally critical fire weather conditions are possible, including in the mountains of Del Norte and Humboldt counties
- Isolated showers and thunderstorms are possible across interior portions of Southern Region
- Reduced air quality remains an issue due to the extensive smoke being produced by the numerous wildfires across the state

Tuesday-Saturday

- Warming temperatures will lead to low to moderate heat concerns across Inland and Southern Regions
 - High heat-related health concerns could develop in some locations for Thursday onward
- Dry weather is generally expected to continue statewide
- Elevated fire weather concerns will likely persist statewide due to warm temperatures, low humidity, and occasionally gusty conditions
- Reduced air quality will likely remain an issue due to the extensive smoke being produced by the numerous wildfires across the state
